As of 2015, AutoCAD is used by 2.75 million users. Most of its users are in the United States and Canada. AutoCAD can be used for various types of design activities, including basic drafting and technical design. Its features include 2D and 3D CAD tools. A wide range of output formats such as DWG and DXF can be exported from AutoCAD. The cost of AutoCAD varies widely depending on the number of seats that are required, the included software, and the features being used. History [edit] AutoCAD's history began in 1983 with a mainframe version designed by Tim Miller, Roger Melen, Gary Shaffer, and David Heath of the Stanford Linear Accelerator Center (SLAC). Their team, the Cocoa project, was one of many collaborating on the initial implementation of an object-oriented programming language, Smalltalk. Their effort led to the first self-running object-oriented application, an AutoCAD version was also completed and released for a mainframe computer in October 1984. The first version, AutoCAD 1.0, introduced the new object-oriented CAD interface and was sold for \$2,995 as a boxed version and \$5,495 as a license-only version. It was released for the 8,9,16, and 32-bit models of the IBM PC. A port for the Macintosh was released the next year. AutoCAD was the first major CAD program to use a mouse-driven graphical user interface, and it was one of the first commercial CAD programs to use an object-oriented approach. AutoCAD 2.0 was released in January 1986, and in October 1987, it was announced that Tim Miller and Rod Pedersen would be leaving SLAC and joining Autodesk. In 1989, the first version of AutoCAD for Windows, AutoCAD 2.0D, was introduced. It was followed by AutoCAD 2.5 in 1990. AutoCAD 2.5, released in April 1990, introduced the DWG format, a successor to the DXF format, and several other features. In addition, the use of the DWG format was the first commercial application that used the Lotus Freelance suite of application development tools. AutoCAD 3.0, released in November 1991, marked the first major upgrade of the product since AutoCAD 2.5. AutoCAD 3.

Valentinio Azzino Valentinio Azzino (1580 – c. 1655) was an Italian painter of the late-Mannerist or early-Baroque period, active mainly in his hometown of Brescia, Lombardy, Italy. Biography Little is known of his life and early career. From the records of his death, it is known that he had a workshop in the San Francesco church of Verona, where he was based. He was said to have worked in Brescia from 1626, in the church of San Francesco di Assisi in Brescia, and was commissioned to decorate the façade of the present church. He collaborated with the Flemish painter, Pieter van den Broecke. He also collaborated with the German painter, Paul Hainzeler. Among his paintings are a Martyrdom of Saint Lawrence, and an Annunciation. He also painted frescoes on the lunettes of the four Corniches of a church in Verona, known as the Beata Zita.
