By Keryn Rahl, Editor, Jedi News Behind the Scenes of the Kessel Run Following the quick and exhilarating undercurrents of what Star Wars: The Kessel Run reveals about the Han Solo and Lando Calrissian character arcs, there are even more key points to consider when examining the tale of the famed (and famously cold) space jockey and the charming gambler. While the main point of this journey through Han Solo's life is to showcase how creative the Lucasfilm/Disney writers are in continuing the iconic saga, they also aim to sketch a portrait of Lando Calrissian in a way that reveals new and interesting things about him, while paying homage to the romantic and life-affirming aspects that fans are familiar with. The following behind-the-scenes look will continue to explore more about the man who helped Han Solo turn his life around and take a path that ran through Gamorr. How is Han really? We know from the beginning that Lando's heart was always with the Rebellion, which arguably couldn't have been more accurate (during the Rebellion, Lando manned the Mos Eisley spaceport in the years leading up to the Battle of Hoth). During the events of the trilogy, we see Lando help Han and Chewbacca escape the clutches of the Imperial Navy, and he does so (and profits) by trading with the Empire. Although he doesn't actively serve in the Rebellion, he does help the group and the galaxy as a whole in countless ways, and in the process gains a new appreciation for the good that a rebel leader can do. We have performed first-principles calculations to investigate the electronic properties of α -GaSe and its

alloy with GaSe and Ge. The results show that GaSe is a n-type semiconductor with a band gap of 1.86 eV, which means that α -GaSe is a suitable candidate for photovoltaic applications. We discuss the electronic properties of α -GaSe in the context of the wide-gap semiconductor material that is currently attracting much attention because of its potential for photovoltaic applications. Review: Oasis Press I'm a sucker for typewriter books, my sister's entire library is something like 650 books on typewriters. Of course most of them are about typing, and some are great but a surprising number are awful. I keep coming across more and more that are funny, inventive, and full of life. I don't own a typewriter, but I own a few antique ones from bygone eras. Unfortunately I can never find a good source of typewriter keys to go with them, which is a shame because a properly weighted typewriter wouldn't be all that hard to sit down and type on, except that I'd be scared of being a time traveler and being my worst self on the page as well as in life. I've thought a few times of making my own keys and sticking them onto an antique, but that 6d1f23a050
